

Serbian Spell Checker (SrpSpell) represents Serbian language support package for GNU aspell (<http://aspell.sourceforge.net/>). SrpSpell contains three dictionaries (Cyrillic, Latin and combined) and two word lists (Cyrillic and Latin) with 343,242 word forms. Default dictionary is the combined dictionary. Words are encoded in UTF-8 code page, normalized to special 8bit code page l-sr. Description of this code page can be found in file *misc/l-sr.txt*. GNU aspell files *l-sr.cset* and *l-sr.cmap* are included in this package. Support for accented vowels is built in, but in current release dictionary does not have any words accented vowels.
